

Protect New Jersey's Do Not Call laws. Do not allow telemarketers to weaken our effective law. We do not need federal government meddling with one of the most effective consumer protection/privacy laws in the country.

The only thing these telemarketers want is the right to bother people and intrude into our lives when we have stated that we do not wish to receive any of these sort of calls. My telephone is paid for by me, for my own benefit, NOT for the benefit of every scam artist and telemarketer trying to sell me something I don't want or need during my dinner. My right to privacy is more important than there privilege of harrassing me on the phone.
